

QUARELLA MARBLE COMPOSITE MAINTENANCE

TILES:

We recommend **daily** cleaning of *Quarella Marble Composite* tiles, remove dirt using a **broom** or vacuum cleaner. **Wash** the floor with a **neutral** detergent in warm water, and then **rinse** with clean warm water.

Periodically after washing, **wax** and buff the **tiles** with a soft clean **cloth** of buffing machine.

Do not use product-containing **acids**, such as bathroom ceramic ware **cleaners**, thinning **and** paint removers.

BENCH TOPS:

When ordering *Quarella Marble Composite* for **Kitchen Bench Tops** we recommend that you **specify** a "**Honed Finish**" which is a **dull** look, but more **practical**. *Quarella Marble Composite*, as well as natural marble, reacts to **acids** in foods, such as fruit juice, **vinegar** and alcohol. **Acids** eat into the polished surface leaving dull patches. **Staining** can occur, but as *Quarella Marble Composite* is **denser** than natural marble, it is **less** porous.

Vanity Bench Tops can be **specified** in either **polished** or honed material. Do not leave wet perfumed **soaps** or aerosol cans on bench tops as these may **stain**.

EVERYDAY CLEANING:

To clean use **pH Neutral** detergents.

Sealer can be re-applied every 6 to **12** months. We **recommend** the use of Q Seal sealers and cleaners available from head office in Thornbury.
